

REMARKS

This Amendment is responsive to the Office Action dated February 18, 2005. Applicant has amended claims 1, 15-17, 22 and 38, and canceled claims 14, 18, 21, 31, 32 and 43-46. Claims 1, 3, 4, 6-10, 13, 15-17, 22-28, 38, 41 and 42 are now pending.

As a preliminary matter, Applicant notes that a Supplemental Information Disclosure Statement is being submitted in parallel with this response. The Supplemental Information Disclosure Statement cites materials received from a foreign patent office in relation to a related patent application.

In the Office Action, the Examiner indicated that previous claims 21, 44, and 45 would be allowable if rewritten in independent form. In this Amendment, Applicant has amended all the claims to be in condition for immediate allowance, consistent with the Examiner's remarks. Specifically, Applicant has amended claim 1 to include the limitations formerly recited in claim 21 and intervening claim 14. Applicant has amended claim 22 to include the limitations formerly recited in claim 45 and intervening claims 31 and 32. Applicant has amended claim 38 to include the limitations of claim 44 and intervening claim 43.

All claims are now in condition for allowance.

Notwithstanding the claim amendments discussed above, Applicant does not acquiesce to any of the Examiner's rejections or characterizations of the prior art. All the amendments discussed above are being submitted solely in the interest of advancing the current application to immediate issuance. However, Applicant reserves the right to present some or all of the canceled claims in one or more continuation applications.

For at least the reasons advanced previously on the record, Applicant maintains that the applied references do not disclose or suggest a display including a housing and a processor that adjusts color images, the processor being housed within the housing of the display. Applicant also maintains that the Examiner's continued reliance on the cases of *In re Larson* and *In re Lockhart* is improper, for the reasons advanced in the previous response.

With regard to the claims that the Examiner has currently indicated as including allowable subject matter, Applicant notes that each of these claims recites a housing and a processor that adjusts color images, the processor being housed within the housing of the display. Applicant believes that this feature alone patentably distinguishes the applied and cited prior art.
